

This document shows the changes developed on the product and on the added modules.

It aims to provide visibility on the activities of development made by Digisoft.  
 The version from which the change is visible is shown in the title.

<b>Message Blanking</b> Nuova Implementazione	12/10/2017 11:33:13	688675
Branch rilascio 10 19		
Automatically erase messages older than three months		
<b>Syncpalmari:reception of files to the directory FromPlam throught "SendMessage"</b> Nuova Implementazione	06/10/2017 20:24:16	688261
Branch rilascio 10 18		
Now, handhelds can send files in the background to the "frompalm" Directory (or .zip file to import) using the mechanism for sending Restqueue messages in background		
<b>Coin counters and countings</b> Nuova Implementazione	06/10/2017 17:04:13	686422
Branch rilascio 10 18		
Inserted possibility to enter / modify the total value of the counted tickets, if on the related audit there is the audited total value of the ticket		
<b>Reassignment of called</b> Nuova Implementazione	05/10/2017 11:37:24	687281
Branch rilascio 10 18		
If the call has been reassigned to another subject, the field CHIA_RIC became yellow If the call is refused, the field is red		
<b>Internal Documents</b> Nuova Implementazione	27/09/2017 16:30:05	686421
Branch rilascio 10 17		
It is possible to see the eventual alternative billing field found on the order that has created the document		
<b>Printing of the internal document</b> Nuova Implementazione	27/09/2017 16:27:54	686420
Branch rilascio 10 17		
The data of the recipient in the Internal Documents Report correspond to the data of the Alternative Billing Registered Office, if available Otherwise, the report will show the data visible in the Internal Document		
<b>EVADTS: Ticket Restaurant with Coges Systems</b> Nuova Implementazione	25/09/2017 16:10:07	686598
Branch rilascio 10 17		
Added the import of the identification code that is related to the ammount recharged by the ticket MA5**COG001*005*082*100*100		
<b>Audit</b> Nuova Implementazione	05/09/2017 20:10:19	683669
Branch rilascio 10 14		
Added the option to make a change to the internal annotation field even after the electronic audit has been processed.		
<b>Added Planogram Change Log Mask</b> Nuova Implementazione	05/09/2017 15:37:05	683537
Branch rilascio 10 14		

The mask can be opened either from the menu of the pOs (in the "historical" submenu) or from the main menu (under "installation data"> User Notice)

### **B. I.: analisys of used spare parts**

Nuova Implementazione

02/09/2017 12:58:22

683308

Branch rilascio 10 14

Added extraction options concerning All types of intervention (Including those in the workshop).

There is a filter that allows you to unplug the ones related to breakdown (EXTERNAL or INTERNAL)

### **Spare parts consumed by technician**

Nuova Implementazione

02/09/2017 11:53:54

683307

Branch rilascio 10 14

Added in the report an extraction of the totals, divided by consumed quantity in external and internal technical intervention

### **Logistic Areas on warehouses, merchandiser and branches**

Nuova Implementazione

01/09/2017 18:12:59

682578

Branch rilascio 10 14

Added new field Logistic Area to the tables warehouses, merchandiser and branches

### **Logistics area**

Nuova Implementazione

01/09/2017 18:11:56

682577

Branch rilascio 10 14

Added a new multilanguage table in order to define working areas. The logistic area is identified by code and description

### **Audit Devices Table**

Nuova Implementazione

24/08/2017 11:43:50

682564

Branch rilascio 10 14

Added a new table: Audit Devices, in order to catalog the devices that enable audit on payment systems . Devices are defined by code, description, and type (enum DEVICESRILEV).

### **Work Orders closing**

Nuova Implementazione

11/08/2017 16:34:46

681817

Branch rilascio 10 14

The work order linked to a call is closed if it arrives the message of call executed

### **Change of PoS**

Nuova Implementazione

26/07/2017 13:14:01

679249

Branch rilascio 10 14

Added PoS change over call management when receiving a handheld message of this type:

- Accepted call (only recording answers)
- remote reassignment
- rejected call
- traveling to PoS
- call executed (also unresolved)
- data collected by handheld (if called enhanced)

### **EVADTS. Failure in counters reset**

Nuova Implementazione

26/07/2017 10:52:14

679795

Branch rilascio 10 14

### **Telemetry: Last Audit**

Nuova Implementazione

18/07/2017 14:48:19

678005

Branch rilascio 10 14

this field indicates the last real-time telemetry audit

<b>Vendix Charge Proposal</b>			
Nuova Implementazione	18/07/2017 14:45:15	678004	
Branch rilascio	10	14	
A new method is implemented, via realtime message queue, which allows the device to request the situation on the stock of a given PoS.			
The method goes to check whether telemetry is configured on the PoS and, in the case, reads the last data saved after the request			
<b>B. I.: Analisis of vehicle Stock</b>			
Nuova Implementazione	17/07/2017 14:23:00	678461	
Branch rilascio	10	14	
Added a flag in order to decide if consider or not returns in the control "refilled"			
<b>New method to charge the stocks</b>			
Nuova Implementazione	14/07/2017 11:04:24	677999	
Branch rilascio	10	14	
It is possible to charge the stock in real time, having a filter related to warehouses managed by the merchandiser			
<b>Customer holidays</b>			
Nuova Implementazione	07/07/2017 09:44:07	676851	
Branch rilascio	10	12	
Interventions Exports are excluded where the date of delivery falls during a holiday period.			
<b>Purchases: canvass management</b>			
Nuova Implementazione	04/07/2017 09:36:48	676089	
Branch rilascio	10	12	
It is possible to control the status of the canvass when you calculate prices in the discounts procedure			
<b>BI: Technical Intervention - Spareparts analisis</b>			
Nuova Implementazione	27/06/2017 20:40:15	649086	
Branch rilascio	10	12	
Added new field in the possible extractions: Quantity of used spareparts			
<b>Import of invoices on Selling PoS: evaluation of the counterbalances code with Vends product</b>			
Nuova Implementazione	27/06/2017 14:44:17	651888	
Branch rilascio	10	12	
Import of invoices on Selling PoS: evaluation of the counterbalances code with Vends product			
<b>BI Analisis of unpaid by Site</b>			
Nuova Implementazione	27/06/2017 12:25:18	649085	
Branch rilascio	10	12	
The farmer field is now extractable			
<b>VxW 10.12: Cash movements and store of documents</b>			
Nuova Implementazione	21/06/2017 16:11:37	648768	
Branch rilascio	10	12	
It is possible to attach documents to the cash movements			
<b>Delivery boxes</b>			
Customizzazione per cliente	19/06/2017 16:37:34	648352	
Branch rilascio	10	12	
it is possible to define the number and the typology of the boxes used on the delivery (devided in 3 typologies used in the preparation of shipments)			
<b>Closing period of the PoS</b>			
Nuova Implementazione	14/06/2017 15:51:30	647497	
Branch rilascio	10	12	

Starting from the 10.11 version, it will be possible to set the closing period related to the PoS, and it will be added to the closing period of the Customer			
<b>Rentability analysis</b>			
Nuova Implementazione		27/05/2017 10:24:05	638624
Branch rilascio	10	10	
Added new value, based on the refillment and technical assistance cost, based on the standard cost of the single visit defined on the model, similar to what you can set on simulations			
<b>Audit : Added generic Notes field</b>			
Nuova Implementazione		25/05/2017 14:29:46	638174
Branch rilascio	10	9	
Added a field where it will be possible to write free notes related to the audit			
<b>EVADTS: recalculation details of vends as a difference between total (PA1) and cashless (LA1*1)</b>			
Nuova Implementazione		24/05/2017 10:32:27	637428
Branch rilascio	10	8	
In the cash payment calculation phase as the difference between total and cashless in case of a negative value, the progressive counter was never recorded. Now it is handled as long as the current one is superior to the previous one.			
<b>EVA_GENERATOR: added DIVA System generation</b>			
Nuova Implementazione		22/05/2017 17:09:55	635405
Branch rilascio	10	8	
Added the opportunity to convert sales events from DIVA systems. You can convert events directly from the Paradox (.db) format or .csv format that replicates the same structure as the Paradox format			
<b>Replacement of a VM</b>			
Nuova Implementazione		22/05/2017 12:55:11	637427
Branch rilascio	10	8	
Added evidence during the new VM replacement phase. if the latter is on the load document of someone It is reported on which loading document the VM is present			
<b>Installation of a new VM</b>			
Nuova Implementazione		22/05/2017 12:53:58	637426
Branch rilascio	10	8	
Added evidence during the new VM installation phase. if the latter is on the load document of someone It is reported on which loading document the VM is present			
<b>VM archive</b>			
Nuova Implementazione		22/05/2017 12:53:10	637425
Branch rilascio	10	8	
If the VM is on a load document of someone, the field of the serial number is yellow			
<b>Mobile Devices</b>			
Nuova Implementazione		16/05/2017 17:25:34	634980
Branch rilascio	10	8	
Added buttons to enable or deactivate a mobile device			
<b>EVADTS: Details of coins pieces</b>			
Nuova Implementazione		16/05/2017 10:59:33	635402
Branch rilascio	10	8	
Added details of coin pieces management (with progressive counter)			
<b>EVADTS: ELKEY recharging keys management</b>			
Nuova Implementazione		12/05/2017 18:35:45	630850
Branch rilascio	10	8	

Added ELKEY recharging keys management with customized fields MA5				
<b>EVADTS: Stock detail CA17 tubes</b>				
Nuova Implementazione			12/05/2017 18:34:33	630849
	Branch rilascio	10	8	
Implemented the import of the details of tubes CA17				
<b>EVADTS: Added management of charging keys on ELKEY systems</b>				
Nuova Implementazione			12/05/2017 12:17:10	630848
	Branch rilascio	10	8	
Added management of charging keys on ELKEY systems				
<b>Planogram</b>				
Nuova Implementazione			11/05/2017 21:02:14	635051
	Branch rilascio	10	8	
Now the planogram activation is conditioned on the number of pieces control and confirmation.				
<b>Planogram</b>				
Nuova Implementazione			11/05/2017 20:58:49	635049
	Branch rilascio	10	8	
to each planogram it is possible to assign a typology defined in the Planogram Type table				
<b>VM Planogram</b>				
Nuova Implementazione			11/05/2017 20:54:39	635048
	Branch rilascio	10	8	
It is possible to create a promotion on products that are in different linked spaces				
Nuova Implementazione	Branch rilascio	10	7	11/05/2017 17:09:18 634969
<b>Preparation of shipments: user management</b>				
Nuova Implementazione			10/05/2017 09:13:04	630845
	Branch rilascio	10	7	
The user is now traced				
<b>Added field on the Branch: "Aggiunto campo sulla filiale "Exclude branch from generating cash-collection call"</b>				
Nuova Implementazione	Branch rilascio	10	6	24/04/2017 12:20:45 628195
VxW 10.6				
With this flag on YES, related to each branch, it is not created the call for the cash collection of the related PoS				
Nuova Implementazione	Branch rilascio	10	6	18/04/2017 09:28:42 627117
<b>Shipping Places: ZIP Code Management</b>				
Nuova Implementazione			18/04/2017 09:27:58	627116
	Branch rilascio	10	6	
Added ZIP Code list, Place, Nation, Province of Shipping Places (if set up)				
<b>Enable NavisionAX to send first installations</b>				
Nuova Implementazione			12/04/2017 18:30:40	626556
	Branch rilascio	10	5	
If account management is set to NavisionAX, export is enabled.				
<b>VegaTelemetry: Next-IT System. Date error handling and reporting to the user</b>				
Nuova Implementazione			12/04/2017 16:28:28	626486
	Branch rilascio	10	5	

Next-IT systems, not having a board-to-board clock, retrieve time from the GSM network. In order to avoid errors (incorrect date), the data is captured and recorded with the current date at reception.			
If a system sends messages without the latter being configured in vega, the event is signaled via the DGMessenger.			
<b>Export of Lavazza Firma Products</b>			
Nuova Implementazione		11/04/2017 08:59:38	626026
Branch rilascio	10	5	
Added a new field of System description and related evaluation on Product Table The data is sent in the capsule informations			
<b>Send Messages with active availability but not configured on Site</b>			
Customizzazione per cliente		10/04/2017 17:00:20	626024
Branch rilascio	10	5	
Deleted sending the message to the PoS technician / Merch. holder, when the availability is active but on the site is not set.			
<b>Export of refill calls</b>			
Nuova Implementazione		11/03/2017 08:25:38	617559
Branch rilascio	10	1	
This form, in the case of navisionAX management, exports refill calls. Calls are exported as a refill request if the point of sale has a 'partial service' contract (see manual.pdf for plant and plant configuration). In the OCS case, they are exported as sales orders.			
<b>Preparation of shipment</b>			
Nuova Implementazione		10/03/2017 11:59:52	617475
Branch rilascio	10	1	
In this form, It is now possible to manage even Accessories of PoS and VM			
<b>Lavazza FIRMA</b>			
Nuova Implementazione		02/03/2017 09:34:27	610190
Branch rilascio	10	1	
Added the option of re-sending the message in error Inc ase of error, the date of resending is set up to 4 attempts			
<b>PoS proposed by an external software</b>			
Nuova Implementazione		24/02/2017 09:37:58	605641
Branch rilascio	10	0	
Form that allows to import production progress for a PoS proposed by external ERP. Imports enabled with Accounting Type (IMP_MXW) set to NavisionAX (in Installation Data).  The form imports data by updating them in the proposed PoS (and, if present, in the VM connected to them)			
<b>Control of VM Stock. in real time, at the end of the refueling and cash collection operation</b>			
Nuova Implementazione		23/02/2017 09:21:19	607439
Branch rilascio	10	0	
If the form is active, it becomes visible: One button on VM archive to activate the initial stock of VM. , the data is read from the last physical inventory made by the Merchandiser., or, in the absence of this element, from the configuration of VM. set in Vega. A new form showing the stock of VM. at the last refill, this stock is updated in real time each time a refueling message and / or a receipt message or a variation of the same item is received within Vega. Monitor Manager: a new stock control light is activated Maintenance Tours; a new stock control light is activated			
<b>New Flag Warehouse Movements Reasons: "Block warehouse movements if derived from a document "</b>			
Nuova Implementazione		22/02/2017 10:42:42	608785
Branch rilascio	10	0	
New Flag warehouse Movements Reasons			

- 1) default on S (yes)
- 2) During the upgrade process, this script is executed to properly validate the field on the reasons already inserted by re-reading the origin of stock movements with that reason .

**Preselling by HandHelds: Date of processing of the order****Nuova Implementazione**

22/02/2017 09:39:26

609147

Branch rilascio 10 0

To avoid violations of keys while the order is processing, the date of movement is increased by 2 minutes and a few seconds at random.

**Added support for PNG images for the images of products****Nuova Implementazione**

21/02/2017 17:49:14

609095

Branch rilascio 10 0

You can now also associate products with PNG images (the "transparencies" are respected)

**Telemetry: SDA Courier Service Send system****Nuova Implementazione**

13/02/2017 17:49:34

607162

Branch rilascio 10 0

Implemented for the SDA Courier Service the SendSystem Mode  
Unlike File Sending Mode, the waybill is done directly in vega.

**Module ReikaGo****Nuova Implementazione**

13/02/2017 17:39:50

607161

Branch rilascio 10 0

You can now activate a post-paid module for ReikaGo systems even if the PV / Multi Group Code is not configured.  
Of course in this case the vends will not be accounted.
